INTRODUCTION

The research method uses qualitative research in collecting and selecting data for research. Data based on Levinson's theory analysis. The object of this research is utterances that contain deixis in the story of Snow White. The research question of this investigation is what kind of deixis is found in the film Snow White and how is deixis used in the film. Deixis is one of the linguistics forms in pragmatics that can help the reader or speaker to understand the meaning of an utterance. In studying deixis means learning one aspect of natural language to require the reference of who are the speaker and the hearer, the place and the time of speaking in which the deictic word used. Many language phenomena use deixis, such as poem, lyric, film, novel, talk show, and also advertisement. In our daily life, we always find advertisement around us, such as in magazine, newspaper, internet, radio, or television. Based on the findings, it us conclude that there are 5 types of deixis there are person, deixis, place deixis, time deixis, discourse deixis and speech deixis.

Introduction

The concept used is Levinson's concept of deixis, Levinson (1983:152) says that deixis is a very easy way to research, the relationship between language and context or the relationship between deixis and language is reflected. Levinson divides deixis into
five types, namely person deixis, deixis place, time deixis, discourse deixis and social deixis.

Levinson (1983:65) further says that in its use, deixis is distinguished between gestural and symbolic. An indication is said to be signaling if the designation is accompanied by body movements, if the designation is not accompanied by body movements it is called symbolic.

Previous research on deixis conducted by Magfirah Thayyib on Deixis in Tae’ and English (A Pragmatic Contrastive Analysis). The word deixis comes from the Greek word deiktikos, which means direct reference. The use of deixis has been widely applied in everyday speech and is also commonly applied in other written works (Lubis & Nasution, 2021). The knowledge of deixis itself is often overlooked by ordinary people, and they tend to be unconcerned or unaware of the existence of this deixis, starting with the distribution of the types of deixis or how it is used. “Deixis is how the language encodes the grammatical features of the context of the utterance or utterance event, and therefore the interpretation of the statement depends on the language” (Dylgjeri & Kazazi, 2013).

Deixis takes several elements of its meaning from the context, such as personal, spatial, temporal, discourse, and social. Deixis is an important separate area of language research and is very important for second language learners. Deixis can be found in everyday language such as business, politics, and education. In daily conversation. In English lessons, needed a text book to understand the language.

Deixis is a reference term that can change or change depending on who the speaker is, when and where the utterance is given (Salamah, Octaviani, & Isnaini, 2021). Deixis often appears in two situations, formal and informal. Formal signs occur when a student has a conversation consisting of the singular, the first sign, the first plural, the second plural, the second plural, and the third singular. In addition to personality deixis, researchers also found space or place deixis, time deixis, language deixis, and community deixis. The reason someone uses deixis is to explain to the reader or listener the speaker, the purpose of the utterance, and the time of the utterance (Nisa, Asi, & Sari, 2020).

Research on deixis studies is rarely done by researchers, so this research is necessary so that the research results can form a literature review on the field of deixis and also the literature. Reference for other researchers and for teachers as deixis-related information and references in supporting the learning process (Jumaedah, Saleh, & Hartono, 2020). Then, in non-academic fields, the results of this study can help clear up referral misunderstandings that occur in the community.

The author reads the story Snow White and The Seven Dwarfs repeatedly to get the text and rereads it to get utterances that contain deiction. The identified data were analyzed descriptively using Levinson's (1983) theory about the types and their use in a gestural and symbolic manner. The reason the researcher chose the story of Snow White is that when reading the story the researcher found that the characters in the story used a
lot of deixis in their conversation. Therefore, the writer was interested in conducting research on deixis in the story of Snow White.

A. DEFINITION OF DEIXIS

Deixis is a branch of linguistics, namely pragmatics. The word deixis comes from the Greek *deiktios* which means "directly signifies something". A word is said to represent when the speaker moves or changes depending on where and when the word is spoken (Stenstrom, 2014). Deixis can also be understood as a word whose reference always changes depending on the context. Deixis is also a part of linguistics, a part of pragmatics, which deals with changing words or sentences through situations and contexts of sentences (Dylgjeri & Kazazi, 2013).

According to Bambang Kaswanti Purwo's book 'Pragmatics and Language Teaching'. Words like mine, our words lost here, now. Words like these have no fixed references (Grangé, 2013). Unlike words like chair, house, paper. From whose chair, house, paper, everywhere, always refer to the same thing. But the recognition of my words here can only be known now, although it is known by whom, where and when they were spoken.

B. TYPES OF DEIXIS

Levinson (1983:62) states that semantics in English will be divided into 5 parts: personal show "personal display", place sign "place sign", time sign "time sign", space", social sign "social sign", and speech image. ...'speech deixis'. As Levinson's book (Practical) explains:

1. Personal semantics (Personal Deixis)

   Personal semantics is concerning cryptography the participants of the speaking event within which the speech was created. the non-public class is split into 3 categories: the primary person is that the speaker's own grammatical reference, the person codes the speaker's regard to one or a lot of addresses. Third parties write references to people and entities aside from the interpreter or recipient of the statement involved. Levinson (1983: 62).("Personal semantics is bothered with the speech participant's understanding of the speech scenario once the phrase is spoken. sort[thesort][the kind] of non-public impression is split into 3 parts: first-person type, self-referential synchronic linguistics of the word. speaker." person is that the speaker's data of references to 1 or a lot of purpose. The person is data of the regard to that person and also the presence of the speaker and recipient of the supposed expression. access").

   For example, once victimisation the primary person function word, the speaker refers to himself, the person refers to 1 or a lot of individuals addressed to a different person, whereas the person refers to somebody aside from the speaker and also the interlocutor. (Nadar F.X.:2009:56). So, victimisation personal semantics, the speaker will relate to something. It will be someone (person) or one thing (something). Personal semantics words embrace subject pronouns (I, you, we, he, she, he, she), object pronouns (I, you, she, he, she, we, you, you), possessive adjectives (mine, yours, his).
consist of, his, we, they), possessive pronouns (I, yours, he, she, we, and she) and reflexive pronouns (I, I, myself, main) I, I).

For a lot of details, see the subsequent samples of personal deixis:
"He needs to urge the very best score within the final exam"

In her own words, the speaker could be a girl, though she is also relating another girl once another girl says constant factor. The word O doesn't amendment, however the reference will amendment looking on WHO pronounces it. The word he's the descriptor of the person subject function word. "He set himself on fire"

In the example higher than, there area unit 2 kinds of individual semantics. the primary is yourself, the second is yourself. These 2 words see the speaker. military intelligence is that the solely third-person kind of the topic function word, whereas the word itself refers to the sole reflexive military intelligence.

2. Time semantics (Time Deixis)
Time notation refers to the relative time of incidence of a voice communication or voice communication. Time illustration is that the main reference for the role of participants, therefore it's necessary to differentiate the instant of speaking from the instant of reception (Levinson, 1983: 73). ("Deixis time is associate idiom of democratic operate, semantics time is vital to differentiate between speak time and decision time").

Time semantics are going to be terribly straightforward to understand if the speaker and recipient understand the time of the voice communication and also the course of the voice communication and also the purpose of the voice communication. There area unit many words that embrace time semantics, including: currently, yesterday, tomorrow, today, months, afternoon, etc.
"Tomorrow is Sunday"
The word tomorrow belongs to time semantics as a result of it refers to the relevant day (Nassirtoussi, Aghabozorgi, Wah, & Ngo, 2015). From the voice communication, the time once the voice communication is mentioned is on Friday (Friday) as a result of the word tomorrow refers to weekday (Saturday).
"I saw him last week"
The word last week (next week) is enclosed within the semantics of your time, the word last week refers to a particular time once the voice communication is being mentioned.

3. Place semantics (Site Deixis)
Spatial semantics could be a spatial comparison between the speaker and also the object in question. Levinson sees in linguistics. point illustration means that spatial cryptography per the participant's position within the speech (Levinson, 1983: 62). ("Position notation relates to understanding the situation of the space or place used in order that the speaker speaks"). Place semantics will be seen victimisation demonstrative pronouns like "this" and "that", and may even be viewed as place adverbs like "here" and "there".
"Here he is"
The word "there" is an adverb of an area familiar to the speaker and an area wherever the speaker is aware of its meaning.

4. Social semantics

Social semantics emphasizes or shows variations in social characteristics between the topic or reference mentioned within the speech, the speaker, and also the recipient, or the author and speaker (Fowler & Kress, 2018). In Levinson, Fillmore states that social deixis is bothered with aspects of sentences that replicate or outline what is determined by the realities of the social context within which the vocalization happens (Culpeper & Haugh, 2014). (/Fillmore notes that in Levinson, social expression relates to aspects of sentence understanding that confirm or confirm the likeness of social reality within the emergence of speech acts/). Also, girls and Gentlemen, Crown choose, unearned President, etc.

There are unit forms accessible in many languages for licensed recipients, as well as restrictions on most address headers (Lampesberger, 2016). (There are variety of instances wherever language enters social relations within the kind of respect for those of high rank, as well as the restriction of nicknames like "Sir, Sir, Sir." President/). Another example of social notation is that the use of the words die, die, die, die, die to specific the state of being dead. every of those words is employed otherwise.

5. Speech Deixis

Discourse notation refers to these things to show the elements of future discourse (Fairclough & Fairclough, 2013). Discursive notation implies the use of utterances in a statement to indicate some content of oral discourse (including the use of the utterance itself) (Larrain & Haye, 2012). (/Discursive notation deals with various problems used to design discursive elements (Cruise, 2000: 323), According to Levinson (1983: 85), discursive notation concerns understanding the use of expressions in different interpretations of speech. use of the speech itself). The presentation of discourse is a reference to certain parts of the discourse that are given or developed (Agustina, 1995: 47). Speech is denoted by Deixis, Anaphora and Catafora. A reference is said to be reversed if the reference or successor refers to something already mentioned. A reference or reference is said to be a cathode if the reference refers to the object in question.

When a word that refers to a certain part of the text is used as a reference in the actual discourse, it can be called display discourse. Examples of argumentative sentences are before, first, next, next Thursday, last paragraph, and so on. If a pronoun is used to refer to a person introduced as part of a discourse, it can be included in the discourse indicator, or the pronoun can also be spoken as a joint reference.

"I was born in Indonesia and lived here all my life"

"It was a great day"

"Good story"

The word here refers to Indonesia because the speaker was born and lives in Indonesia, while the word refers to the date which then refers to the date. There is a
difference between this form of demonstration: this and this. Sometimes it is used in the main part of a speech, while it is used at the end of a speech.

Methods

This article used Qualitatif research. Qualitatif research is research that used to descriptive, describe, explain, find the qualities or features of social influence that cannot be explained, measured or described through a qualitative approach. Research used the Qualitatif approach when collecting and selecting the data for research. Defines that qualitataif research is research procedure which observed the data in written or oral form of people and behavior (Mohajan, 2018). The story of Snow White used as the research object in this occasion, because the story of Snow White is famous and many people read the story. So that, the researchers are interested how many deixis in the story.

Results and Discuss

The deixis of person found in this story are categorized into 3 categories, namely: First person deixis, second person deixis, and third person deixis.

1. First person deixis

First person deixis is show the speaker who is speaking. Example: I, me, myself, mine, we, us, ourselves, our, ours.

Table 1. First Person Deixis

<table>
<thead>
<tr>
<th>No</th>
<th>Type</th>
<th>Word</th>
<th>Sentence</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>First person deixis</td>
<td>We</td>
<td>We'd better check upstairs</td>
</tr>
<tr>
<td>2</td>
<td>First person deixis</td>
<td>Our</td>
<td>You already cleaned up our place</td>
</tr>
<tr>
<td>3</td>
<td>First person deixis</td>
<td>I</td>
<td>But I have no money</td>
</tr>
</tbody>
</table>

a. The word we in the sentence *We’d better check upstairs* refers to the dwarves, which denotes the speaker who is speaking.

b. The word our in the sentence *You already cleaned up our place* also refers to the dwarves talking to Snow White.

c. The word i in the sentence *But I have no money* refers to Snow White talking to a witch.

1. Second person deixis

Second person deixis is shows himself as a speaker but does not speak and he becomes a listener (Saputri, 2016). Example: you, yourself

Table 2. Second Person Deixis

<td>我自己</td>
</tr>
</tbody>
</table>

558 Jurnal Pendidikan Indonesia, Vol. 3 No. 6 Juni 2022
Second person deixis

You
Who are you?

You
What do you know?

3. Third person deixis

Third person deixis is shows people who do not take part in the story but are mentioned. Example: he, she, they, him, himself, her, herself.

Table 3. Third Person Deixis

<table>
<thead>
<tr>
<th>No</th>
<th>Type</th>
<th>Word</th>
<th>Sentence</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Third person deixis</td>
<td>They</td>
<td>The next morning before they left for work.</td>
</tr>
<tr>
<td>2</td>
<td>Third person deixis</td>
<td>She</td>
<td>She went upstairs</td>
</tr>
<tr>
<td>3</td>
<td>Third person deixis</td>
<td>He</td>
<td>But she was the queen and what could he do?</td>
</tr>
</tbody>
</table>

a. The word they in the sentence The next morning before they left for work Pointing at the dwarves.
b. The word she in the sentence She went upstairs Pointing to Snow White.
c. The word he in the sentence But she was the queen and what could he do? Pointing to the maid that Snow White's step mother ordered to kill her.

2. Time Deixis

Time notation refers to the relative time of occurrence of a conversation or conversation (Norris, Voida, Palen, & Voida, 2019). Time representation is the main reference for the role of participants, so it is important to distinguish the moment of speaking from the moment of reception. There are time deixis in Snow White:

Table 4. Time Deixis

<table>
<thead>
<tr>
<th>No</th>
<th>Type</th>
<th>Word</th>
<th>Sentence</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Time Deixis</td>
<td>Once upon a time</td>
<td>One upon a time, a princess named snow white live in castle.</td>
</tr>
<tr>
<td>2</td>
<td>Time Deixis</td>
<td>Another day</td>
<td>I can not wait another day.</td>
</tr>
<tr>
<td>3</td>
<td>Time Deixis</td>
<td>The next morning</td>
<td>The next morning, before they will left for work.</td>
</tr>
<tr>
<td>4</td>
<td>Time Deixis</td>
<td>Now</td>
<td>Now, She had to run away frome home.</td>
</tr>
</tbody>
</table>
5 Time Deixis One day One day, the prince happened to pass through.

6 Times Deixis At Once At once, Snow White eyes opened.

1) In first row the table, there is time deixis. "Once upon a time" show the time at the beginning of the story.
2) In second row, there is time deixis. "Another day" Show the time that the queen cannot wait in another time.
3) In third row, there is time deixis. "The next morning". Show the time that the seven dwarf give a information that cinderella can not open the door for the next day.
4) In fourth row, there is time deixis, "Now". Show the time that cinderellah to run away from home.
5) In fifth row, there is time deixis," One day". Show the time that the price happened to pass through.
6) In sixth row, there is time deixis, "At once". Show the time that the princesss eyes opened.

3. Place Deixis

Place Deixis is Deictic reference to a location relative to the location of a participant in the speech event, typically the speakers (Pratiwi, 2018). Place Deixis in Snow white and Seven Dwarves Story:

<table>
<thead>
<tr>
<th>N0</th>
<th>Type</th>
<th>Word</th>
<th>Sentence</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Place Deixis</td>
<td>in a castle</td>
<td>Snow White lived in a castle with her father...</td>
</tr>
<tr>
<td>2</td>
<td>Place Deixis</td>
<td>into the woods</td>
<td>The next day he took Snow White into the woods.</td>
</tr>
<tr>
<td>3</td>
<td>Place Deixis</td>
<td>From the cottage</td>
<td>Yet no sound came from the cottage, only light from the windows.</td>
</tr>
<tr>
<td>4</td>
<td>Place Deixis</td>
<td>In the royal garden</td>
<td>They would take long walks in the royal garden and tell each other stories, and laugh.</td>
</tr>
<tr>
<td>5</td>
<td>Place Deixis</td>
<td>The living room</td>
<td>After Snow White cleaned up the living room, she went upstairs.</td>
</tr>
<tr>
<td>6</td>
<td>Place Deixis</td>
<td>On the second floor</td>
<td>On the second floor, there were seven little beds lined up in a row, as if for children.</td>
</tr>
<tr>
<td>7</td>
<td>Place Deixis</td>
<td>Returned home</td>
<td>when they returned home that night.</td>
</tr>
</tbody>
</table>
Deixis In Story Snow White And Seven Dwarfs

8 Place Deixis The kingdom They returned to the kingdom and lived happily ever after.

1) The word castle in the sentence snow white lived in a castle with her father...
2) The word Woods in the sentence The next day he took Snow White into the woods.
3) The word Cottage in the sentence Yet no sound came from the cottage, only light from the windows.
4) The word Royal Garden in the sentence They would take long walks in the royal garden and tell each other stories, and laugh.
5) The word living room in the sentence After Snow White cleaned up the living room, she went upstairs.
6) The word second floor in the sentence on the second floor, there were seven little beds lined up in a row, as if for children.
7) The word home in the sentence when they returned home that night.
8) The word kingdom in the sentence They returned to the kingdom and lived happily ever after.

Social Deixis

Social deixis is the giving of forms according to social differences that refer to the role of participants, especially aspects of social relations between the speaker and the listener or the speaker with several references (Febriza, 2020). Social Deixis in Snow white and Seven dwarfs Story:

Table 6. Social Deixis

<table>
<thead>
<tr>
<th>NO</th>

2) The word this in the sentence “I wouldn’t mind more magic like this!”
3) The word that in the sentence Something is fishy around here, that’s for sure.

**Kesimpulan**

Based on the analysis of Deixis in Story snow white and seven dwarf, the researchers have found 5 types of deixis used in Story snow white and seven dwarf. Those types of deixis are person deixis, place deixis, time deixis, discourse deixis and speech deixis. It was found that there were 3 cases of first person deixis, 2 cases of second person deixis, 3 cases third person deixis, 6 cases of times deixis, 8 cases of place deixis, 4 cases of social deixis and the last 3 cases of speech deixis. From the result of the listed explanation, it can be concluded there were found any deixis in story snow white and seven dwarves. By using deixis, the story will be more completed and easily conveyed the message.
